Projects

HR Attrition Predictive Analytics Dashboard | Power BI

Project Showcase Link [Prince Paswan - Power BI HR Analytics Project - Google Drive](#)

- Developed a 3-page interactive dashboard in Power BI, analyzing data for 1,470 employees to provide actionable insights on reducing a 16.1% attrition rate.
- Engineered an advanced analytical experience using complex DAX measures, AI-powered visuals (Decomposition Tree, Key Influencers), and interactive Drill through functionality.
- Designed a stunning, user-friendly UI with dynamic Slicers and translated the analysis into a key business recommendation to focus on at-risk employees.

AI-Powered Voice Assistant | Python, Streamlit, MySQL:

- Built a voice-controlled assistant enabling hands-free system operations via natural language commands.
- Implemented secure user authentication and command history using MySQL; deployed UI via Streamlit.
- Integrated speech recognition (Google API) and text-to-speech (pyttsx3) for real-time interaction.
